TAKE 5 FOR SAFETY

5-MINUTE SAFETY DRILL

Driving: Inspections Keep Us Safe

Date:_____

Student:_____

Dept:_____

Station:_____

Training Code:_____

NOTES:

CHALLENGE

Improperly operating apparatus poses several problems for the department and community served. Vehicle accidents are one of the highest occurring types of injuries to firefighters and the general public.

To ensure we are able to respond when needed, we must have an effective maintenance program. Our system of removing apparatus from service should be clearly communicated and adhered to. We should never operate a piece of apparatus that is unsafe or in violation of our policies!

DISCUSSION

- What are our department's maintenance policies?
- How do you communicate maintenance concerns?
- How can we improve our inspection and maintenance procedures?

The greatest asset of the fire service is our people; protect them.
