TAKE 5 FOR SAFETY

5-MINUTE SAFETY DRILL

Driving: Blow Outs Are Symptoms

Date:_____

Student:_____

Dept:_____

Station:_____

Training Code:_____

NOTES:

CHALLENGE

A blow-out creates an extremely dangerous situation. This is especially true when the emergency vehicle is traveling at a high rate of speed or the road conditions are less than desirable. Regular maintenance programs and pre-trip inspections can ensure "We Get there Safely."

DISCUSSION

- What are the department's SOP's regarding vehicle inspection and maintenance?
- When is equipment red-tagged?
- How do we control vehicle use?
- Have you ever operated a vehicle that you felt was unsafe?
- Are equipment and vehicle issues communicated to the safety committee?
- How can we improve our inspection and maintenance documentation?

The greatest asset of the fire service is our people; protect them!
