TAKE 5 FOR SAFETY

5-MINUTE SAFETY DRILL

Risk Management: It's Your Call!

Date:_____

Student:_____

Dept:_____

Station:_____

Training Code:_____

NOTES:

CHALLENGE

Each year community boundaries expand. This growth can create unusual exposures for firefighters. In this case, a plane has crashed into a residential area in the early morning hours. Hospitals, schools and a busy freeway are within a few blocks of the crash! You've arrived and it's your call!

DISCUSSION

- As the safety officer, what are your immediate concerns?
- As the incident command officer, how would you proceed?
- What regulatory agencies should be contacted?
- What concerns about evacuation and containment do you have?
- If this happened in your city, how prepared would your department be to respond?
- Have you drilled with scenarios such as this in mind?
- Do you have an agreement with departments with more experience to provide assistance?
- What other concerns impact the safety of citizens and firefighters?

The greatest asset of the fire service is our people; protect them!
