TAKE 5 FOR SAFETY

# 5-MINUTE SAFETY DRILL

## Risk Management: It's Your Call!

**Date:**_____

**Student:**_____

**Dept:**_____

**Station:**_____

**Training Code:**_____

NOTES:

### CHALLENGE

Residential fires pose special problems for firefighters. As land values increase, multi-family dwellings increase. New construction is a constant fact of life. Instead of urban sprawl, you are faced with ever increasing multi-level structures. This fire is moving fast throughout the neighborhood with several structures already engulfed.

In cases like this there is the delicate balancing act of risking a lot to save lives that may be at risk. It's three o'clock in the morning, you have arrived at this scene. It's your call!

### DISCUSSION

- What are your initial concerns as the safety officer?
- How will you handle communications to ensure the residents evacuate?
- How prepared is the department to fight multi-story fires?
- How would you stage the scene?
- How are you coordinating with other jurisdictions?
- What are your concerns as the incident commander?
- How do you feel this situation will resolve?

**The greatest asset of the fire service is our people; protect them!**
